

Dear UN Security Council Members,

Over 3,300 villages have been destroyed or forcibly relocated in Eastern Burma by the military junta, causing the displacement of half a million persons within Burma and the flight of over one million refugees to neighboring countries. The ruling regime has forcibly conscripted more child soldiers than any other country or armed group in the world and they have systematically employed rape as a weapon of war. The ruling generals have thus far carried out such war crimes and crimes against humanity with impunity. We urge you to refer Burma to the International Criminal Court in order for Burma's ruling military generals to be held accountable for these crimes.

Sincerely,
